

**Letter of Appreciation**

25-Jan-2015

To: Whom it may concern

Dear Sir, Madam:

During the last year, Apache Egypt has given Middle East Supplies a trial to repair their PDC bits in Egypt. Ten 8½" and one 12¼" PDC bits were repaired. The repair process was done by highly motivated, qualified and experienced employees. High quality materials were used, in order to deliver bits that meet our standards.

To date, a few repaired bits have been run in the field. The bits did show similar performance and wear compared to new bits.

I would like to thank Middle East Supplies management and their team for their contribution in making this test successful. I trust Middle East Supplies will continue to make a significant positive impact on the continuation of the use of repaired bits on our projects in Egypt.

We recommend Middle East Supplies as a qualified and reliable partner for PDC bit repair that will co-operate and help our business and those of other operators in the world.

Sincerely,

**Todd Henry**  
Drilling Manager  
Apache Egypt
